

## RecC101-: Recreational Coastal 1x

Meet the **RecC101**, our latest Coastal 1x and the most adventure-ready addition to our fleet. Built to meet **World Rowing standards for Beach Sprint and Endurance** events, this boat is technically race-legal, but its true purpose is pure recreational freedom. At **1 metre shorter** than typical coastal boats, it's designed for ease, agility, and everyday exploration.

### Why you'll love it

- **Compact by design:** A full metre shorter than most Coastal 1x boats, making car-top transport, garage storage, and general handling effortless. The reduced length also helps keep overall weight down.
- **Ultra-stable ride:** A flatter hull gives you added stability, perfect for confidence-building rows or choppy-water fun.
- **Smooth through the stroke:** A wide stern reduces the pitching (that porpoising bounce) you'd expect from a shorter hull.

Mould #	Data
Boat type	1x
Crew weight - kg	60 -120
Crew weight - lb	132-265
Length - cm	500
Waterline Beam - cm	56

### Build options:

Choose from two construction grades:

- **Elite Plus** – our robust, high-quality standard build
- **Carbon Pro** – ultra-light thanks to pre-preg carbon, perfect for easy carrying and long days exploring

#### Boat Weights

Elite Plus	
33.5+/-1kg	74+/-2lbs
Carbon Pro	
27+/-1kg	59+/-2lbs

Customise your setup with either a stern wing or reverse wing rigger, and select from a range of gelcoat colours to make it uniquely yours.
